

**REMARKS**

Reconsideration of the application is requested in view of the amendments to the claims and the remarks presented herein.

The claims in the application are claims 34 to 38, 40 to 42, 50 to 53, all other claims having been cancelled.

The amendment of March 22, 2006 was not entered for the formal reasons set forth in the advisory action and it is believed that the claims in the present amendment are free of the Examiner's objections and are properly presented. As suggested by the Examiner, Claim 43 has been replaced by new claim 53 with a new structural formula which is free if letter constituents. Claim 51 does not contain the phrase the Examiner objected to. Claim 50 is a proper composition claim since it comprises a compound of claim 53 and a pharmaceutical carrier, two ingredients. Claim 41 is free of the terminology noted by the Examiner. Claim 51 is non dependent on product claim 53 and not method claim 41. The typographical error of claim 38 has been corrected. Claim 51 is free of the terminology cited by the Examiner. Therefore, the amended claims are free of the Examiner's objection and 35 USC 112 rejections and entry of the amendment is requested.

In view of the amendments to the claims and the above remarks, it is believed that the claims point out Applicants' patentable invention and favorable reconsideration of the application is requested.

Respectfully submitted,  
Hedman and Costigan
